

MATHEMATICS

Good math students usually are gifted in multiple ways. Not only are they problem solvers, they are usually exceptional at picking up the skills of a second language, or computer science or physics. Manchester also has an outstanding reputation for math education, preparing students to teach. So majoring in math at Manchester gives you a variety of options.

academics *that* matter

By the time math majors are seniors, they're ready for their senior research project. It's challenging, but they're prepared. They choose a topic that interests them and partner with a professor who mentors them through the process. The results are rewarding: a stronger resume, advanced preparation for graduate school, and satisfaction and confidence in finishing a difficult task well.

side *by* side

- Adam Pyle '07 had an interest in encoding e-mail messages so he chose to work on a cryptography project with Professor Young Lee for his senior research requirement.

- Pete Doberstein '07 studied congressional redistricting and alongside Dr. James Brumbaugh-Smith, he used mathematical theories to figure a better way to balance district sizes.
- Rachelle Steggerda '07, along with Professor Brumbaugh-Smith, analyzed nutritional standards, prices, and foods to develop a cost effective balanced diet.

SUCCESS

- Liz DeRyke '06 and Penny Heddings '03, both double majored in math and Spanish; both ended up teaching. Penny's in Germany, and Liz went to the Bronx, N.Y., with the Teach for America program.
- Jarred Jagger '06 is teaching math at Northfield High School; whereas Greg Robison '06, a triple major in math, physics and French, is in graduate school at Purdue University.

I FOUND

... INSPIRATION

After taking just a few classes, the professors opened my eyes to my passion and drive for mathematics. Plus, the friends I've made here are people who appreciate me for me. And every day, I'm inspired by them, their thoughts and their views. Manchester has given me so many opportunities. It's made me so much more confident.

Michelle Miller '10, secondary ed - math
