LEGO® Camp at Manchester University is a FUN way to learn! Students will build up to 10 different simple mechanisms and motorized machines, including a merry-go-round, watch tower, gear racer, tower crane and more. LEGO® Camp uses kits designed to teach students basic principles about engineering, science, technology and math – but more than that, it’s about working with other students, being creative ... and having FUN!

LEGO® Camp meets every day for five days on the Manchester University North Manchester campus. Choose either the morning or afternoon sessions. Registration fees include instruction, use of the LEGO® kits and a t-shirt. Sign up today, and invite a friend!

LEGO® is a trademark of the LEGO Group of companies which does not sponsor, authorize or endorse this program.
