Acute Care: Pain & Palliative Care (Dr. Tracy Brooks):

The Pain & Palliative Care rotation at Parkview Regional Medical Center & Parkview Hospital Randallia will help students develop an understanding of the philosophies and role of hospice and palliative medicine in patient care, be able to identify and resolve medication therapy issues for patients, and work with an interdisciplinary team to achieve positive outcomes in our patients. Palliative Care is a consult service that helps patients and families with pain and symptom management, advance directive planning and discussions and goal setting and potentially transition of care planning. Upon the completion of this rotation, the student will be able to apply gained knowledge in the pain & palliative care setting to provide appropriate patient care.
