

MASTER OF ATHLETIC TRAINING

As the need for athletic trainers grows, Manchester University is responding with an entry-level Master of Athletic Training degree, one of only 20 such programs in the nation.

The Master of Athletic Training degree prepares students to become Certified Athletic Trainers (ATC). Athletic trainers find careers with professional sports teams, colleges and universities, high schools, hospital-based clinics and industry.

An entry-level master's is for students with minimal knowledge and experience in athletic training and who have earned a bachelor's degree in a different discipline. A Master of Athletic Training degree in addition to a baccalaureate degree in another area enhances your versatility in the job market, and enriches the overall breadth of the profession.

Why Manchester?

- Earn an entry-level Master of Arts in Athletic Training in just two years.
- Become a Certified Athletic Trainer (ATC) upon successful completion of the Board of Certification exam.
- Get hands-on clinical experience with an NCAA Division III athletics program and off-campus opportunities.
- Work side-by-side with highly respected faculty in small classes, affording plenty of personal attention.
- Gain college teaching experience through a teaching practicum.

Admissions requirements

Applicants for admission should have a bachelor's degree with at least a 3.0 grade-point average, CPR for the Professional Rescuer certification, and successful completion of some specific undergraduate courses. For more details, visit our website.
